

# Statistics (STCS)

## Introduction

---

There is no denying that the cryptocurrency market has evolved considerably over the last few years. And it is plain to see that the market is literally flourishing, with many new currencies being introduced over time, and more and more people making use of them for various kinds of transactions.

With this huge popularity of cryptocurrencies we also wanted to introduce a cryptocurrency that could offer a real deal to users, as well as ensure that there are great prospects for it. We thus created Statistics (STCS).

Our goal has always been to revolutionize the market by means of Forex services that can make a difference. With STCS you will be able to carry out transactions against a very low commission, which we feel is practically negligible.

We have plenty of things planned for the near future too, such as to further develop our website in order to ensure that we are consistently up to date with the vibrant market, as well as make STCS more widespread.

STCS will shortly be included in cryptocurrency exchanges and from then on it will be available for use when carrying out FX payments. STCS can be used to send and receive transactions, be it to friends and relatives and even for business transactions.

## Introducing STCS

---

STCS is a decentralized cryptocurrency which is based on the BSC blockchain associated with the Fxmerge service. After the great success of Fxmerge we wanted to go a step further, and thereby started working on introducing STCS.

As you are aware, Fxmerge is committed to offering high quality support to forex traders, in terms of statistics from trading accounts, as well as provide tools that can make trading much easier and considerably better.

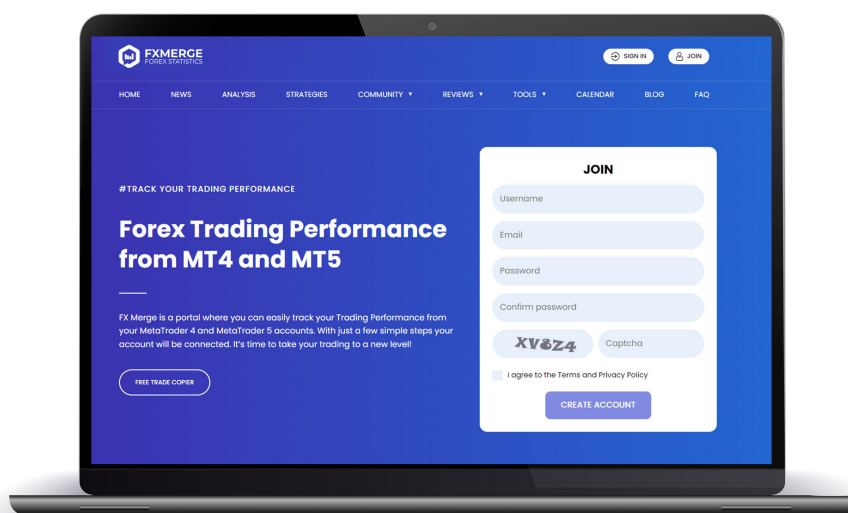

Fxmerge has become of key importance for many traders and for the forex community in general. The company was founded only a few months ago, but we are pleased that we have garnered considerable success and popularity even within this relatively short span of time. In fact, we are pleased to note that new users are joining daily and we are gaining more and more popularity over time.

Traders have been finding Fxmerge to be of great help and support, because rather than spending a lot of time trying to carry out manual analyses, Fxmerge offers the priceless possibility of gaining access to clear statistics effortlessly. These get generated once the trading performance of the user is downloaded from his or her account. The fact that Fxmerge enables users to register for this service for free is undeniably amazing. Besides it works with both Metatrader 4 and Metatrader 5.

## Our Plans for the Future

---

By now the forex market is made up of over 10 million traders from all over the world. With this impressive number of users we are aiming to make our goal as equally impressive because we feel that there is such a huge potential in this market. In fact we are aiming to have around 2 million users start using the Fxmerge website.

## **Fxmerge Development and Promotion**

In view of this we are aiming to further work on the continuous development and expansion of our website. While we are very pleased with what we have managed to achieve so far, especially considering that this was garnered within a very short period of time, we do not want to stop there. We believe that a commitment to continuous improvements of the website are of the essence.

A key part of this is the creation of our own store where customers will have the possibility of selling their own forex tools and services, as well as pay by means of our STCS cryptocurrency. Besides being a great opportunity for users, this will also help to further improve the popularity of our website.

## **The Fee Breakdown**

Our plan in this regard is that for each sale of a product through our store, there will be a fee of 15%. Of this, 5% will be allocated to all holders of the STCS token and there will be 10% of the fee allocated to the ongoing development of the website.

This is a great incentive to have more users buy and use STCS. As you may be aware, most stores charge 20-25% for each product sold, and consequently our store will be more competitive and it will offer better returns to users.

## **Further Promotion of STCS**

The next step will be to introduce STCS to other forex traders such as brokers, traders and other companies or individuals offering such services. This is an important goal as it will gradually make STCS more popular and more widespread.

Gradually, STCS will also be included to various major exchanges available from all around the world. This will also comprise a commitment to the continuous promotion of STCS in order to encourage its use for payments and transactions.

## **The Wallet**

During the coming year 2022-2023, we are also planning to introduce our wallet for Windows, iOS, and Android operating systems. Users will be able to download and install it on their computers, tablets, and smartphones.

## Conclusion

We know that there are thousands of cryptocurrencies out there, and you may be asking what is it that will encourage users to opt for STCS. What is it that makes STCS so unique, or different?

Our focus has always been to ensure that we truly offer a real deal. And considering that the fees are so low, and truly competitive, it is already a very good reason to opt for STCS. Additionally, you will receive a share of the profits from our forex store. Every month, additional STCS will go directly to your wallet, and until then the price of STCS will increase for our community.

## Tokenomics

Token name:	<b>Statistics</b>
Symbol:	<b>STCS</b>
Max supply:	<b>10,000,000,000 STCS</b>
Network:	<b>Binance Smart Chain (BEP20)</b>
Contract:	<b>0x800d2fc288e6a72b92b0692ef520afb0d4c7f63c</b>

The Statistics coin shall be known by the symbol STCS. The maximum supply shall be of 10,000,000,000. We locked 11% tokens for a period of 12 months. We plan to spend this period to further develop the website. Once the 12 months period elapses, they will be unlocked and made available for the STCS community. You can find more information about the 11% locked tokens hereunder
